

Impact 2024

Instructions for the Prisma application form Impact grant

General information

Prisma

All applications must be submitted through the [Prisma application and review system](#). For most of the required steps, user manuals are available. We urge you to consult these when writing your application.

- [Prisma user manual »](#)
- [FAQ Prisma »](#)
- [Prisma support »](#)

Before you apply

Before writing your application, make sure the following conditions are met:

- The main applicant and any participating researchers included in the application have created a personal account in the [Prisma application system](#)
- The main applicant and any participating researchers have stored their CV and details of their publications in their respective personal accounts
- The administrating organisation for the grant has an organisational account in Prisma and has been approved as an administrating organisation at Forte. [Forte's criteria for administrating organisations »](#)
- You meet the requirements and conditions for applying as described in the text "Information about the call" on the [web page for the call](#)

Language

The applications will be assessed by a review panel consisting of swedish researchers and community representatives with knowledge of Swedish conditions. The application can be written in Swedish or English.

Character limits

Please observe that spaces are included in all character limits. If you intend to copy text into the application form, we recommend making sure that the number of characters, according to the word processing programme, matches the number of characters in the form in Prisma. Underlying formatting may be included which causes the number of characters to differ. In such a case, you must either try to clear all formatting by copying paragraphs into Notepad or similar, or type directly in Prisma.

Images

It is not possible to add images in the text fields, these are instead added in the field Image uploader (under Project description). Include a visible reference inside the images so that you may reference them in the text.

Overview

On this page of the application form you can see which parts of the application that are still lacking mandatory information, either from you or your participating researchers. It also shows whether character limits or other types of limits have been exceeded.

Keep in mind that there may be conditions that are not restricted by Prisma as well as fields that are not mandatory and therefore not visible on this page. Read the call text and instructions carefully before registering the application.

Basic information

Project title and abstract

Project title in Swedish (max. 200 characters)

Project title in English (max. 200 characters)

The title should be formulated so that the project's purpose is evident and so that non-specialists may also form an impression of the content of the project. The project title is often used on its own and should be formulated with care.

Abstract in Swedish (max. 2,000 characters)

Abstract in English (max. 2,000 characters)

The abstract should provide an informative description of the project as a whole. It should be able to stand on its own, which is why you should make no references to other parts of the application. It is also important that non-specialists can understand the abstract. If your application is granted, the abstracts in Swedish and English will be published in open project databases without a confidentiality assessment.

Project time

Enter the time frame for your project.

Subject classification

Keywords

Provide 1-5 keywords for your project.

Forte's main areas and sub-areas

Choose a suitable main subject area and a sub-area for your application. Forte reserves the right to reclassify your application.

Alternative sub-area

You have the option of choosing an alternative sub-area for your application. This sub-area may belong to another main subject area. Forte reserves the right to reclassify your application.

Forte's areas of coordination

Forte is the national coordinator for research in five research areas. Choose one of the areas if they apply to your application. If none is applicable to your project, choose the option "no coordination area". Forte reserves the right to reclassify your application.

SCB codes

In order to facilitate future analysis of research funded by all Swedish research funding agencies, all applications are classified according to Statistics Sweden's standard for Swedish classification of research topics. Select research topic at three levels.

Sustainable development goals

Classify your application according to the United Nations' Sustainable Development Goals. You may choose a maximum of three goals. [The United Nations' sustainable development goals »](#)

Project description**Project description***Purpose, description, background, and the project's added value (max. 10,000 characters)*

Explain the purpose of the project and describe the planned activities. Provide a brief overview of the current state of knowledge in the field and how the proposed activities will add to it. Describe how the activities will enhance the opportunities for scientific knowledge to be utilised. Explain how the activities will strengthen the impact of research results in the relevant research area and contribute added value.

Previous Forte grant reference number

Please provide the reference number for the already ongoing project or program grant from Forte to which this application is related.

Work plan (max. 7,500 characters)

Clearly describe what is going to be done and how the work will be organised. The work plan should contain information about the staffing of the project, including details of each individual's tasks. Cooperation with other researchers outside of the project group is also described here. The work plan should be detailed enough for reviewers to be able to assess the feasibility of the project.

Image uploader (max. 4 MB/image)

Here you can upload images that illustrate parts of your project description. Include a visible reference in the image so that you can refer to it in the text. Permitted file extensions: JPG, PNG and GIF format.

Societal relevance and impact*Societal relevance (max. 4,000 characters)*

Explain the project's relevance to identified societal needs by describing the societal challenges the project relates to and how the project intends to help address these challenges. Also explain and justify the project's relevance to its intended stakeholders.

Impact (max. 4,000 characters)

Describe how and to what extent the project is expected to benefit the stakeholders of the research. Explain the demand/need for the intended activity. Define the target groups and describe which actors will be involved, the methods to be used in the work, and the expected outcomes. The impact may, for example, include effects on policy, practice, working methods, and techniques.

Additional project information**Sex and gender perspectives**

Is a sex or gender perspective applicable to your project?

State yes or no.

Explain and justify your answer (max. 2,000 characters)

Explain and justify your answer and describe how this is considered in the application. Please note that we are not asking for information on the research group's composition in terms of sex.

Ethics*Ethical considerations (max. 2,500 characters)*

Address the ethical aspects of the project and how any ethical issues will be handled. Note if the project will be submitted to the Swedish Ethical Review Authority or has received ethical approval. [The Ethical Review Authority »](#)

References*Reference list for the application (max. 9,000 characters)*

Provide a reference list for the application. List publications supporting the project leader's and participating researchers' research competence on the "Publications" page.

Budget

Give an account of how you plan to use the funds that you are applying for. There is no budget limit for this grant type, but a guideline is 1 000 000 SEK for a two-year project. The requested budget must be explained and justified. Costs that fall outside of the project's time frame are not eligible and should not be included in the application.

Activity level and cost categories

Activity level in the project

Enter the estimated activity level for all members of the project as a percentage of full-time employment. The time allocated for each person must be adapted to the persons' project tasks. The main applicant is the project leader and has scientific responsibility for the project and is therefore expected to be active in the project throughout the entire project. The activity level should also be specified for individuals who will not be paid from the project. If some individuals are to be recruited at a later stage and therefore cannot be named in the application, it is possible to enter "to be recruited" in the name field.

Salaries including social fees

Enter salary costs/estimated salary costs including social security contributions for all personnel who will be paid from the project. Salary costs should also be entered for not yet appointed personnel.

Running costs

Specify what is applied for in terms of operational costs. It is important that costs are specified and estimated with as much detail as possible and that they are explained and justified in the text field "Explanation and justification of total budget". Create and name items in the table so that it is clear what the grant will be used for.

It is not permitted to include publication costs for open access publication of research articles in the application. [Forte's guidelines for publication with open access »](#)

Premises costs and the cost of equipment specific to the project, additional to what is included in the indirect costs (OH), must be separately explained and justified in the text field "Explanation and justification of total budget". If the equipment is also to be used outside of the project, only costs related to the use during the project should be included. If the equipment is regarded as capital expenditure, you may only apply for depreciation costs. You must not include the cost of purchasing personal computers or other normal office equipment in the application as these are expected to be covered by the indirect costs.

Government organisations report their costs exclusive of VAT. For non-governmental organisations, Forte only reimburses VAT when it constitutes a real cost for the project. The same applies to foreign organisations.

Total budget

Everything entered in the tables “Salaries including social fees” and “Running costs” is automatically summarised in the table “Total budget”.

In this table, indirect costs (OH) are entered separately. Report indirect costs as a separate item specifying amount per year. Each project participant calculates indirect costs based on the model that the respective organisation uses. These costs are added up and entered into the table.

Explanation and justification of total budget (max. 3,000 characters)

Write a short explanation and justification of the costs you are applying for.

Other funding*Other funding for this project*

If you have applied for or received funding for similar costs and purposes from Forte or another research funder, provide information about it here. Report the name of the funder, the applicant/project leader, type of grant, whether the funding has been granted or not, reference number or equivalent and granted/applied for amount per year.

Administrating organisation

In order for you to apply, your Swedish higher education institution (HEI) or research organisation must have been approved by Forte as an administrating organisation and created an organisational account in Prisma. Approved administrating organisations are listed as choices in Prisma. From there, you can select your HEI as administrating organisation and the relevant unit as the project site for your application. When the call for proposals closes, your application will automatically be sent to your administrating organisation who must then sign the application in Prisma within 7 days. If your HEI/research organisation is missing as a choice in Prisma, it means that they have not been approved as an administrating organisation and must apply to become one. [Forte's criteria for administrating organisations »](#)

Participants**Participating researchers**

The main applicant may invite participating researchers to the application. Participating researchers are researchers with a doctoral degree whose participation is essential for the realisation of the planned research. They do not need to be employed by a Swedish organisation. To be invited the participating researcher must have created a personal account in Prisma. Information about CV and publications that they want to use in the application must first be added to their personal account. Participating researchers must agree to participate in the application before the last day of the call for proposals. If an invited participating researcher has not responded to the invitation in Prisma, the application cannot be submitted. Encourage your colleagues to open an account in Prisma well ahead of the closing date.

Participating administrators

The main applicant may invite a participating administrator to help them complete the application form. The administrator is not part of the project but has access to the draft application. A participating administrator cannot register the final version of an application and does not have access to the application once the final version has been registered in Prisma.

CV

All CV and publication details for applicants and participating researchers are stored on the respective researcher's personal account. Under this heading, all applicants import their CV-data from their personal account. The following limits apply (maximum number):

Educational history

- 1 doctoral degree (mandatory)
- 2 research educations
- 2 basic educations

Professional history

- 3 employments
- 3 post-doctoral assignments
- 3 research exchange assignments
- 3 interruptions in research

Merits and awards

- 3 associate professorships
- 10 supervised persons (5 for participating researchers)
- 5 research grants awarded in competition (3 for participating researchers)
- 3 awards and distinctions
- 3 other merits

Intellectual property

- 3 intellectual properties

Publications

Under this heading, the main applicant and any participating researchers import their publications from their personal accounts. The purpose of these publications is to validate the research competence of these individuals. Applications are limited to ten publications per main applicant and five per participating researcher.

Register

Register your application here. The application cannot be submitted unless all compulsory fields have been completed and no limits exceeded.

Contact information

If you have any questions about the call for proposals or how to fill in the application form, please contact:

Staffan Arvidsson, Senior research officer, staffan.arvidsson@forte.se

Anna-Karin Florén, Senior research officer, anna-karin.floren@forte.se
