| Bilaga 8. SBU:s sökning på Förebyggande arbete och riskhantering vid stalkning | |

Bilaga 1. Metod

Denna rapport är en systematisk kartläggning av forskningsöversikter relevanta för rapportens frågeställningar. Arbetet med denna rapport grundar sig i flera steg och processer och har även skett i samverkan med olika organisationer och instanser. Sammanställning av litteratur och skrivandet av rapporten har gjorts i samråd mellan Susanne Strand med kollegor vid Örebro universitet och Forte som bistått med vägledning i skrivandet av resultatet. Rapporten har även varit föremål för en hearing anordnad av Forte i december 2021. På hearingen deltog externa forskare, myndighetspersoner och praktiker med områdesexpertis, vilka fick möjlighet att ta del av resultaten och ge feedback. Forte har även knutit en referensgrupp till uppdraget bestående av representanter för myndigheter och ideella verksamheter. Referensgruppen har bland annat diskuterat inriktning och tolkning av uppdrag och fått möjlighet att kommentera på utkast. Utöver det anordnade Centrum för Våldsstudier ett seminarium i januari 2022 där innehållet i rapporten behandlades.

Litteratursökning

Litteratursökningen är utförd av SBU:s upplysningstjänst i samarbete med Susanne Strand och kollegor. Rapporten bygger på metaanalyser, systematiska översikter samt övriga översikter med specifikt fokus på arbetssätt, metoder och riskhantering i form av olika insatser och interventioner, samt förebyggande arbetsmetoder och insatser. När det gäller stalkning samt hedersvåld finns det en begränsad mängd forskning på området riskhantering och förebyggande arbete. Därför beslutade vi att de två sökningarna även skulle innehålla artiklar från primärstudier. Datainsamlingen utfördes av SBU:s upplysningstjänst. För mer information om sökord och sökstrategier se bilaga 6, 7 och 8. De systematiska sökningarna genomfördes i databaserna: Academic Search Premier, CINAHL with Full Text, ERIC, Library, Information Science & Technology Abstracts, Psychology and Behavioral Sciences Collection, APA PsycInfo, SocINDEX, Cochrane, Embase, Medline och Scopus.

Datahantering

Hantering av data från SBU skedde genom det webbaserade programmet Rayyan, ett program för hantering och sortering av vetenskapliga skrifter¹. Rayyan möjliggör att skapa olika projekt där en eller fler personer kan arbeta parallellt. Rayyan har även en funktion som möjliggör att olika granskare kan göra olika bedömningar utan att influeras av varandra, det vill säga att en bedömares val osynliggörs för andra bedömare i samma projekt och därmed möjliggör en kontroll av interbedömmarrelabiliteten. Programmet Rayyan användes i denna rapport för att utföra titel och abstract-granskningen samt inom sorteringen och tematisering av översikterna som behandlar våld i nära. Av upphovsrättsliga skäl användes inte Rayyan för fulltextläsning men programmets funktioner användes för att sortera vilka översikter och primärstudier exkluderades och anledningen för exkludering.

¹ Ouzzani m.fl., 2016

Kvalitetsbedömning

För att bedöma kvaliteten för varje översikt användes SBU:s kvalitetsmall AMSTAR (Assessing the methodological quality of systematic reviews) för metaanalyser och översikter². AMSTAR:s mall fokuserar på de centrala aspekterna som exempelvis dataextraktionen, sökningens omfattning, den vetenskapliga kvaliteten, studiernas sammanvägning och publikationsbias³. Utifrån AMSTAR:s mall skapades tre olika nivåer för kvalitetsbedömning⁴;

- *Låg* kvalitet erhöles ifall endast noll till tre av elva kriterier var uppfyllda,
- *Medelhög* kvalitet erhöles ifall tre till sju av elva kriterier var uppfyllda
- *Hög* kvalitet erhöles ifall artikeln uppfyllde åtta eller fler kriterier.

Kvalitetsbedömningen för varje enskild översikt fylldes i enskilt av varje bedömare för att sedan bedömas gemensamt. Vid den gemensamma bedömningen samlades samtliga arbetsgrupper för att diskutera artiklar som bedömdes ha låg kvalitet. De studier som av författarna ansågs besitta låg kvalitet exkluderades för att undvika bias och att bibehålla en hög validitet och reliabilitet i rapporten⁵.

Avgränsning

Rapporten har avgränsats utifrån syfte och frågeställningar där specifika kriterier för inkludering och exkludering har tagits fram utifrån de förutsättningar som funnits för rapportens genomförande.

Kriterier för inkludering i rapporten

I steg tre respektive steg fyra (se procedur) granskades samtliga översikter och primärstudier från sökningen för att dessa skulle uppnå de kriterier som krävdes för att inkluderas i urvalet samt inte överstiga eller uppnå de kriterier som fastställts gällande när en översikt eller primärartikel ska exkluderas. För att läsa mer om vilka översikter och primärstudier som exkluderades och av vilka anledningar se elektronisk bilaga 5. För att översikter och primärstudier skulle ingå i det slutliga urvalet krävdes att de uppnått följande:

Inklusionskriterier

För att en översikt skulle inkluderas krävdes det att översikten behandlade någon form av förebyggande intervention eller metod eller arbetssätt att förhindra våld i nära relation, stalkning eller hedersvåld. Specifikt fanns följande inklusionskriterier där samtliga måste vara uppfyllda för att en översikt skulle inkluderas.

- *Publicerats mellan 2000 – 2021*
- *Undersökningsgruppens deltagare är 15 år eller äldre*
Detta inklusionskriterium gäller inte hedersvåld.

² SBU, 2020

³ Pieper m.fl., 2018

⁴ Canadian Agency for Drugs and Technologies in Health (CADTH), 2011

- *Interventioner eller riskhantering*
Minst en eller flera interventioner eller insatser som har för avsikt att förebygga och förhindra våld.
- *Översikt av något slag*
Uppdraget var att kartlägga de forskningsöversikter som finns inom något av våra huvudområden. En översikt kan vara antingen systematisk eller i form av en scoping review eller översikt samt metaanalys. Inom stalkning och hedersvåld där forskningsfältet är mindre utvecklat och antalet översikter är få har även primärstudier inkluderats för att skapa en bättre bild av vilka kunskapsluckor som finns. Dessa primärstudier behandlas och redogörs för separat inom de aktuella teman för att inte blanda resultatet med översikternas resultat.
- *Vetenskapligt granskad*
För att en översikt eller primärstudie skulle inkluderas i rapporten krävdes det att den skulle ha genomgått en vetenskapligt granskad process, en så kallad peer review process för att säkerställa den vetenskapliga kvaliteten.

Exkluderingskriterier

Utöver de krav som ställdes på översikter för att de skulle inkluderas avsattes även ett antal kriterier för exkludering. Om ett exkluderingskriterium uppfylldes exkluderades översikten eller primärartikeln.

- *Hälso- och sjukvård*
I denna rapport har vi även exkluderat hälso- och sjukvårdens behandlingsarbete eftersom de primärt arbetar med (o)hälsa och våldet således blir sekundär i behandlingen⁶.
- *Behandlingsprogram för våldsutsatta*⁷
Insatser med fokus på utsatthet och för att minska utsatthet exkluderades från denna rapport utifrån att SBU och Socialstyrelsen genomfört en rapport om insatser för våldsutsatta exkluderades de från denna rapport⁸.
- *Barnmorskors preventiva arbete*
Översikter som bygger på insatser där kvinnor sökt vård i kontext till sin graviditet exkluderades utifrån att de primärt inte handlar om våldsutsatthet.
- *Screeningmetoder & riskfaktorer för våld*
Översikter som undersöker hur våld i nära relation upptäcks eller identifieras samt hur risk och återfall i partnervåld estimeras men som saknar explicita interventioner för att förhindra våld, exkluderades utifrån avsaknad av relevans för rapportens syfte.
- *Mer än 30% av urvalet under 15 år*
Rapporten avser att fokusera på vuxna och unga vuxna. Därav fastställdes det att om mer än 30% av de inkluderade studierna i en översikt redovisade ett urval där majoriteten av deltagarna var under 15 år exkluderades översikten från rapporten. Detta gäller inte primärstudier om hedersvåld.
- *Mindre än 20% handlar om våld i nära relation, stalkning eller hedersvåld*
För att säkerställa att viktig information inte förbisetts men samtidigt bibehålla fokus exkluderades översikter där mindre än 20% fokuserade på något av de ämnen rapporten undersökte.
- *Sekundär utsatthet*
Denna rapport undersöker inte olika former av sekundär utsatthet för våld, det innebär att interventioner till individer som är närstående till någon som utsatt andra för våld exkluderades.

⁶ Till exempel har vi exkluderat behandlingsprogram för behandling av psykisk ohälsa, till exempel depression, som i sig skulle kunna leda till minskat våld utifrån att depressionen är det som primärt behandlas.

⁷ Victim intervention prevention (VIP)

⁸ SBU 2021/342 (Insatser för våldsutsatta)

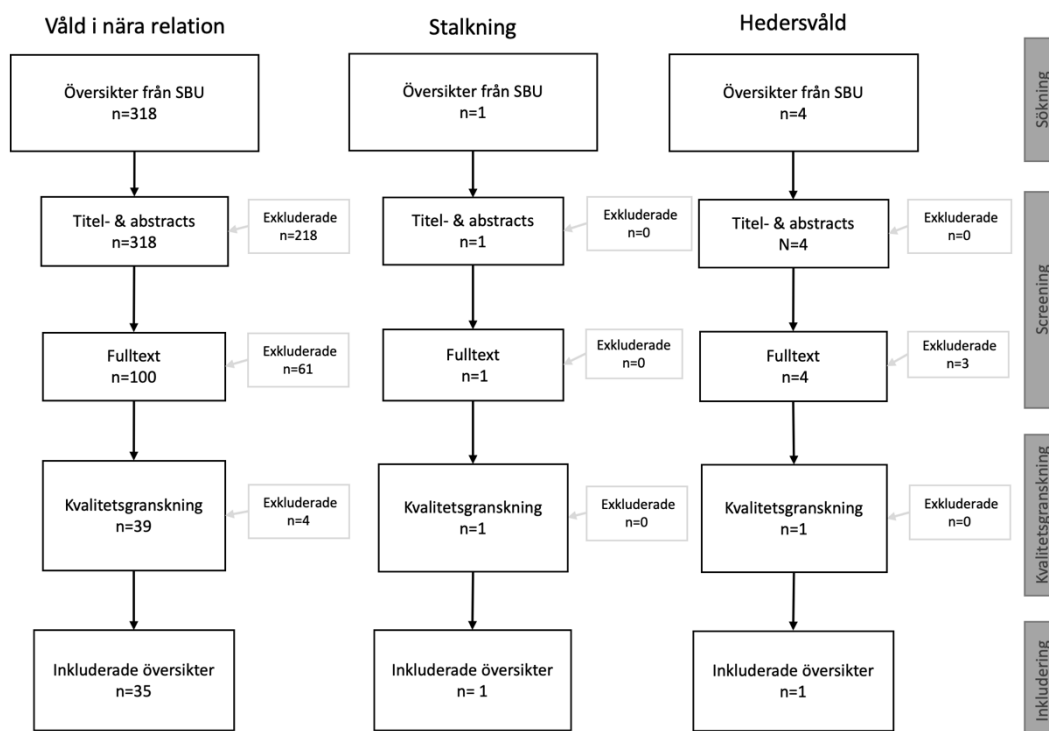

- *Studier med låg överförbarhet*
Studier som undersöker våld i nära relation, stalkning och hedersvåld inom specifika förhållanden inom exempelvis militären eller studier som utförts i låg och medelinkomstländer som inte anses jämförbara med en svensk kontext exkluderades. Det gäller inte studier avseende hedersvåld.
- *Riskbedömningsinstrument*
Översikter som utvärderar eller undersöker riskbedömningsinstrument exkluderades utifrån bristande relevans för rapportens syfte.
- *Översikter som inte är på svenska, engelska eller skandinaviska språk*
Översikter som var skrivna på andra språk än svenska, engelska eller ett skandinaviskt språk exkluderades på grund av bristande resurser för att översätta och tolka resultaten i studierna.
- *Översikter i ett uppdaterat format*
Om två översikter behandlar samma syfte och frågeställningar exkluderades den äldsta av dessa, förutom i de fall den äldre översikten besitter en betydligt högre kvalitet och omfång en den senast publicerade översikten.
- *Överlappande artiklar*
I de fall där två eller fler översikter inkluderar samma primärstudier användes den senast publicerade översikten och de resterande översikterna exkluderades utifrån överlappande primärstudier. Förutom i de fall den tidigare översikten besitter en betydligt högre kvalitet och omfång än den senare översikten.

Procedur

Inför datainsamlingen genomfördes en initial övergripande sökning på samtliga tre forskningsområden i syfte att uppskatta en ungefärlig mängd översikter. Utifrån den initiala sökningen fastställdes vilka sökord som ansågs adekvata för att inte utesluta relevant forskning. Utifrån den initiala sökningen fastställdes även de exkluderingskrav som ansågs nödvändiga för att datainsamlingen skulle bli rimlig i omfång och förhållande till syfte och frågeställningar, samt vilka sökord som ansågs relevanta för att inte utesluta relevant forskning. De finns specificerade i bilaga 6, 7 och 8. Exkluderade översikter finns beskrivna i bilaga 5. Arbetet med att samla in översikter och granska dem genomfördes i fyra steg (se figur 1):

1. **Sökning.** Litteratursökningen genomfördes av SBU:s upplysningstjänst som utförde tre litteratursökningar efter översikter, metaanalyser och systematiska översikter. För mer information se PICO i bilaga 2. Upplysningstjänstens litteratursökning genererade totalt 318 översikter avseende våld i nära relation. För områdena hedersvåld samt stalkning genomfördes ingen begräsning avseende typ av artikel vilket innebar att även primärstudier ingick i sökningen. Sökningen genererade totalt 80 artiklar avseende hedersrelaterat våld och förtryck varav fyra översikter, samt 199 artiklar för stalkning varav en översikt. För en mer detaljerad beskrivning av vilka sökord och vilka databaser som användes se bilaga 6, 7 och 8 för respektive sökning.
2. **Screening.** För att finna de mest relevanta översikterna screenades först titlar och sen abstract. Detta genomfördes separat av minst två oberoende granskare inom respektive område samt att huvudförfattaren deltog i granskningen av samtliga tre områden. Översikter vars abstracts inte uppfyllde relevanskriterierna, det vill säga PICO (se bilaga 2), och dubletter exkluderades. Översikter som hade något av exkluderingskriterierna exkluderades från rapporten. Totalt granskades 323 översikter varvid 218 av dessa exkluderades.

3. **Fulltextläsning.** Steg tre bestod av en mer djupgående läsning där översikter och artiklar noggrant och detaljerat bearbetades i fulltextformat. Fulltextläsning genomfördes av huvudförfattaren till rapporten och en ansvarig för respektive tema, där de översikter som inte uppfyllde inkluderingskraven eller uppfyllde ett eller flera av exkluderingskraven, exkluderades. De olika grupperna diskuterade gemensamt de översikter där det var oklart för att minska risken att relevanta översikter skulle exkluderas. För de 105 översikter som inkluderats till fulltextläsning genomfördes en tematisering av översikter (figur 1). Fulltextläsning genomfördes av huvudförfattaren och minst en till för respektive tema. 64 översikter exkluderades.
4. **Kvalitetsgranskning.** De 41 översikter som återstod efter fulltextläsning kvalitetsgranskades separat av en författare. Därefter diskuterades bedömningen av kvaliteten i helgrupp där konsensbeslut fattades om vilka översikter som skulle inkluderas eller exkluderas. Av de 41 översikter som granskades exkluderades fyra om våld i nära relation utifrån bedömd låg kvalitet. Ingen översikt om stalkning eller hedersvåld exkluderades. Det slutgiltiga antalet inkluderade översikter var 35 avseende våld i nära relation, en för stalkning och en för hedersvåld.

Figur 1. Procedur av urval av översikter där n är antalet översikter.

Primärstudier

För området stalkning och hedersvåld inkluderades även primärstudier. För stalkning genererade sökningen 198 träffar varav 141 exkluderades i titel- och abstractsgranskning, och 57 granskades i fulltextgranskning varav 44 exkluderades. Totalt inkluderades således 13 primärstudier för stalkning. För hedersvåld genererade sökningen 80 träffar varav 50 exkluderades i titel- och abstractsgranskning, och 30 granskades i fulltextgranskning

varav 27 exkluderades. Totalt inkluderades således tre primärstudier för hedersrelaterat våld och förtryck.

De redovisas i form av ett beskrivande övergripande resultat om vilken forskning som existerar på området.

Analys

En innehållsanalys genomfördes i syfte av att sortera in de inkluderade översikterna i olika teman. Några teman var deduktiva, det vill säga teman som var förutbestämda, och innefattade; HBTQI-relationer, kvinnor som våldsutövare, stalkning samt hedersrelaterat våld och förtryck. Eftersom fokus i denna rapport har varit att undersöka brottsförebyggande arbete för att minska våld i nära relation, stalkning och hedersvåld ville vi säkerställa att arbetssätt och metoder inkluderade våldsutövare eller våldsutsatt oavsett kön. Därför bestämde vi i förväg att det skulle finnas ett tema om HBTQI-relationer och ett tema om kvinnor som våldsutövare. Stalkning och hedersvåld blev separata teman utifrån att vi vill lyfta dem och inte dölja dem i de andra temana där våld i nära relation dominerar.

Den andra analysen var induktiv, vilket innebar att teman identifierades och togs fram utifrån de översikter som inkluderats. Därefter, inom varje enskilt tema, redogjordes resultaten översiktligt med fokus på att identifiera såväl befintlig kunskap som kunskapsluckor. Denna redogörelse inkluderade att tydligt identifiera huvudresultaten från varje översikt och att redovisa de utmaningar och begränsningar som fanns med varje översikt. För några av de teman som innehöll flera översikter identifierades även kategorier baserade på likheter i resultaten. Till exempel, inom temat "Behandlingsinsatser till våldsutövare" fanns möjlighet att skapa fler kategorier, så som kategorin "Parterapi". Resultatet för varje tema redovisas i löpande text med kategorier för varje enskilt tema.

De två förutbestämda temana om stalkning och hedersrelaterat våld och förtryck, inkluderade även primärartiklar som analyserades separat. Detta utifrån att rapporten inledningsvis avsåg att behandla enbart översikter. Analysen av dessa är i första hand övergripande och inte resultatorienterade och handlar mer om vilka områden som finns beforskade.

Beskrivning av evidens är gjord enligt följande:

| | |
|-----------------------------|---|
| Det saknas forskning om ... | Det finns ingen eller väldigt lite forskning på området. |
| Det saknas evidens för ... | Forskning finns men pekar inte i någon riktning eller på tydlig effekt. t finns några studier som påvisar effekt men inte i tillräckligt stor omfattning eller att de har bristande design. |
| Det finns evidens för ... | Forskning finns med bra design, flera primärstudier och översikter med liknande resultat. |

Bilaga 2. PICO framställt av SBU

Förebyggande arbete och riskhantering avseende våld i nära relationer

Fråga:

Vilken kunskap finns om förebyggande arbete och riskhantering avseende våld i nära relation, specifikt; mäns våld mot kvinnor, våld i samkönade relationer och kvinnors våld mot män?

Frågeställare: Forte

Avgränsningar

Upplýsingstjénstun vid SBU har gjort sökning (se avsnittet Litteratursökning) i databaserna Academic Search Premier, CINAHL with Full Text, ERIC, Library, Information Science & Technology Abstracts, Psychology and Behavioral Sciences Collection, APA PsycInfo, SocINDEX, Cochrane, Embase, Medline och Scopus.

Upplýsingstjénstun har tillsammans med frågeställaren formulerat frågan enligt följande PICO. PICO är en förkortning för patient/population/problem, intervention/indextext, comparison/control (jämförelseintervention) och outcome (utfallsmått):

- Population: Förövare i nära relationer (mäns våld mot kvinnor, våld i samkönade relationer och kvinnors våld mot män) – inkluderar även insatser riktade till offer/överlevare i grovgallringen och noterar detta i kommentar till referenserna
- Intervention: Förebyggande insatser, riskhantering (inklusive screening, riskanalys) – inkluderar även kartläggning/associationer av riskfaktorer i grovgallringen och noterar detta i kommentar till referenserna
- Control: Annan insats eller ingen insats – används inte för gallring
- Outcome: Riskförändring, våld – används inte för gallring

Våld och försummelse riktat mot barn (<15 år), extrema situationer (krig, flykt, naturkatastrofer) samt interpersonal violence (om inte partnervåld är specificerat) exkluderas.

Litteratursökningen har begränsats till systematiska översikter.

För att vi skulle inkludera en artikel i svaret krävde vi att den var publicerad på engelska eller ett av de skandinaviska språken.

Endast artiklar som genomgått en peer review är inkluderade.

Förebyggande arbete och riskhantering avseende stalkning

Fråga:

Vilken sammanställd forskning och vetenskapliga studier finns om förebyggande insatser och riskhantering vid stalkning?

Frågeställare: Forte

Avgränsningar

Upplysningstjänsten vid SBU har gjort sökningar (se avsnittet Litteratursökning) i databaserna Academic Search Premier, CINAHL with Full Text, ERIC, Library, Information Science & Technology Abstracts, Psychology and Behavioral Sciences Collection, APA PsycInfo, SocINDEX, Cochrane, Embase, Medline och Scopus.

Upplysningstjänsten har tillsammans med frågeställaren formulerat frågan enligt följande PICO. PICO är en förkortning för patient/population/problem, intervention/indextext, comparison/control (jämförelseintervention) och outcome (utfallsmått):

- Population: Förövare och utsatta vid stalkning
- Intervention: Förebyggande interventioner och riskhantering – inkluderar även riskfaktorer och mätinstrument vid gallringen
- Control: Annan insats eller ingen insats – används inte för gallring
- Outcome: Riskförändring, återfall – används inte för gallring

Artiklar som behandlade stalkning där den utsatta och förövaren inte har haft en tidigare nära relation, exkluderades.

För att vi skulle inkludera en artikel i svaret krävde vi att den var publicerad på engelska eller ett av de skandinaviska språken.

Litteratursökningen har inkluderat systematiska översikter och primärstudier.

Endast artiklar som genomgått en peer review är inkluderade.

Förebyggande arbete och riskhantering avseende hedersrelaterat våld och förtryck

Fråga

Vilken sammanställd forskning och vetenskapliga studier finns om förebyggande insatser och riskhantering vid hedersrelaterat våld och förtryck (hedersvåld)?

Frågeställare: Forte

Avgränsningar

Upplysningstjänsten vid SBU har gjort sökningar (se avsnittet Litteratursökning) i databaserna APA PsycInfo, SocINDEX, Academic Search Premier, Cochrane, och Sociological abstracts. Upplysningstjänsten har tillsammans med frågeställaren formulerat frågan enligt följande PICO. PICO är en förkortning för patient/population/problem, intervention/indextest, comparison/control (jämförelseintervention) och outcome (utfallsmått):

- Population: Förövare av och utsatta för hedersvåld
- Intervention: Förebyggande interventioner och riskhantering – inkluderar även riskfaktorer och mätinstrument vid gallring
- Control: Annan insats eller ingen insats – används inte för urval
- Outcome: Riskförändring – används inte för urval

För att vi skulle inkludera en artikel i svaret krävde vi att den var publicerad på engelska eller ett av de skandinaviska språken.

Litteratursökningen har inkluderat systematiska översikter och primärstudier.

Endast artiklar som genomgått en peer review är inkluderade.

Bilaga 3. Kvalitetsgranskning

Översikter bedömdes utifrån SBU:s Mall för kvalitetsgranskning av systematiska översikter enligt (AMSTAR)⁹. Bedömningen gjordes utifrån följande frågor:

1. Redovisas en förutbestämd metod för genomförandet?
2. Gjordes studieurval och dataextraktion av två oberoende granskare?
3. Var litteratursökningen av tillfredsställande omfattning?
4. Användes studiernas publikationsform som ett inklusions-/exklusionskriterium?
5. Finns förteckningar över inkluderade och exkluderade studier?
6. Har de inkluderade studiernas karakteristika och resultat redovisats?
7. Har den vetenskapliga kvaliteten hos de ingående studierna utvärderats och dokumenterats?
8. Har vederbörlig hänsyn tagits till de inkluderade studiernas vetenskapliga kvalitet vid formulering av slutsatserna?
9. Användes lämpliga metoder för sammanvägning av studiernas resultat?
10. Har sannolikheten för publikationsbias* bedömts?
11. Är eventuella intressekonflikter angivna?
12. Slutlig bedömning (låg, medel och hög)
13. Slutlig bedömning (inkludera: ja/nej)

Bilaga 4. Inkluderade översikter

Denna bilaga innehåller information om de översikter som inkluderades i rapportens resultat samt bedömdes ha medel till hög kvalitet i kvalitetsbedömningen. Samtliga referenser till de inkluderade översikterna återfinns i rapportens referenslista och är markerade med *. För information om vilka översikter och primärstudier som inte inkluderades se bilaga 5 som finns att få på begäran via på Fortes webb.

Tabell 1. Inkluderade översikter i tema primärprevention och våld i ungas nära relationer.

| Tema. Primärprevention | | | | | | |
|---|--|-------------|--------------------------------|------------------------|---------------------------|----------------------|
| <i>Författare, Årtal</i> | <i>Ämne</i> | <i>Land</i> | <i>Antal studier</i> | <i>Antal deltagare</i> | <i>Kvalitetsbedömning</i> | <i>Metod</i> |
| Casey m.fl., (2018) | Insatser avseende jämställdhet mellan könen | USA | 22 Artiklar och en bok | 25 | Medel | Systematisk översikt |
| Heard m.fl., (2020) | Olika teatertekniker som prevention mot våld i nära relation | Australien | 15 Artiklar och ett bokkapitel | 6798 | Hög | Systematisk översikt |
| Kiani, m.fl., (2021) | Stärkande insatser för våld mot kvinnor | Iran | 11 Artiklar | 9614 | Hög | Systematisk översikt |
| Lund (2011) | Samhällsinsatser för våldsutsatta med funktionsvariationer | USA | 16 Artiklar | 416 | Medel | Systematisk översikt |
| Tait & Lenton (2015) | Internetbaserade insatser mot alkoholanvändning | USA | 5 Artiklar | 17 594 | Hög | Systematisk översikt |
| Wilson m.fl., (2014) | Alkoholprevention och sambandet till partnervåld | Australien | 21 Artiklar | - | Hög | Systematisk översikt |
| Tema. Våld i ungas parrelationer | | | | | | |
| Graham m.fl., (2021) | Interventioner specifikt riktade till män och pojkar | USA | 9 Artiklar | 3640 | Hög | Systematisk översikt |

| | | | | | | |
|------------------------------|---|-----|----------------|--------|-------|--------------------------------|
| Jennings m.fl., (2017) | Interventioner mot våld i ungas parrelationer | USA | 42 Artiklar | 17 778 | Medel | Meta- analys |
| Russell m.fl., (2021) | Interventioner mot våld i ungas parrelationer | USA | 10 Artiklar | 15 953 | Hög | Meta- analys |
| Storer m.fl., (2016) | Bystander program | USA | 15 Artiklar | 6646 | Medel | Översikt |
| Wong m.fl., (2021) | Interventioner mot våld i ungas parrelationer | USA | 31 Artiklar | 9386 | Hög | Meta- analys Kvantitativ |

Tabell 2. Inkluderade översikter i tema prevention vid arbetsplatser, samverkan på samhällsnivå och insatser från rättsväsendet

| Tema. Prevention vid arbetsplatser | | | | | | |
|---|---|--------------------|----------------------|------------------------|---------------------------|--------------------------------------|
| <i>Författare, Årtal</i> | <i>Ämne</i> | <i>Land</i> | <i>Antal studier</i> | <i>Antal deltagare</i> | <i>Kvalitetsbedömning</i> | <i>Metod</i> |
| Adhia, m.fl., (2019) | Arbetsplatsbaserade insatser mot partnervåld | USA | 6 Artiklar | 2612 | Medel | Systematisk översikt |
| Pollack m.fl., (2010) | Arbetsplatsbaserat stöd för anställda och deras familj avseende diverse problem | USA | 9 Artiklar | 380 | Hög | Systematisk översikt |
| Tema. Insatser från rättsväsendet | | | | | | |
| Bö Vatnar m.fl., (2021) | Professioners anmälningsskyldighet avseende partnervåld | Norge | 25 Artiklar | 13 337 | Hög | Systematisk översikt |
| Cordier m.fl., (2021) | Besöksförbud och dess olika effekter avseende våld | Australien & Norge | 25 Artiklar | 31 586 | Hög | Systematisk översikt och meta-analys |
| Hoppe m.fl., (2020) | Effekten av att bli arresterad och upprepat utövande av våld | USA | 11 Artiklar | 8540 | Hög | Meta-analys |
| Maxwell & Garner (2012) | Rättsliga åtgärders effekt på förebyggandet av våld | USA | 31 Artiklar | 37 215 | Hög | Systematisk översikt |
| Prenzler & Fardell (2017) | Situationella säkerhetsåtgärder mot våld | Australien | 15 Artiklar | 5700 | Medel | Systematisk översikt |
| Tema. Samverkan på samhällsnivå | | | | | | |
| Johnson & Stylianou (2020) | Samhällsinsatser med fokus på polisiärt engagemang | USA | 18 Artiklar | 18 552 | Hög | Systematisk översikt |
| Zeoli m.fl., (2016) | Insatser mot skjutvapenvåld i partnerrelationer | USA | 19 Artiklar | 51 794 | Hög | Systematisk översikt |

Tabell 3. Inkluderade översikter i tema behandlingsinsatser för våldsutövare.

| Tema 6. Behandlingsinsatser för våldsutövare | | | | | | |
|---|-------------------------------------|-------------|----------------------|------------------------|---------------------------|----------------------|
| <i>Författare, Årtal</i> | <i>Ämne</i> | <i>Land</i> | <i>Antal studier</i> | <i>Antal deltagare</i> | <i>Kvalitetsbedömning</i> | <i>Metod</i> |
| Akoensi m.fl., (2012) | Behandlingsprogram för våldsutövare | UK | 12 Artiklar | 1586 | Hög | Systematisk översikt |
| Arce m.fl., (2020) | Behandlingsprogram för våldsutövare | Spanien | 25 Artiklar | 20 860 | Hög | Meta-analys |
| Emezue m.fl., (2019) | Behandlingsprogram för våldsutövare | USA | 8 Artiklar | 4358 | Hög | Integrativ Översikt |
| Ferrer-Perez & Bosch-Fiol (2018) | Behandlingsprogram för våldsutövare | Spanien | 13 Artiklar | - | Medel | Systematisk översikt |
| Karakurt m.fl., (2016) | Behandlingsprogram för våldsutövare | USA | 6 Artiklar | 470 | Hög | Meta-analys |
| Karakurt m.fl., (2019) | Behandlingsprogram för våldsutövare | USA | 13 Artiklar | 1100 | Hög | Meta-analys |
| O'Connor m.fl., (2020) | Behandlingsprogram för våldsutövare | Australien | 13 Artiklar | 2338 | Hög | Översikt |
| Ogunsiji & Clisdell (2017) | Behandlingsprogram för våldsutövare | Australien | 10 Artiklar | - | Medel | Översikt |
| Oliffe m.fl., (2020) | Behandlingsprogram för våldsutövare | Kanada | 21 Artiklar | 1901 | Medel | Översikt |
| Spencer m.fl., (2021) | Behandlingsprogram för våldsutövare | USA | 6 Artiklar | 1847 | Hög | Meta-analys |

| | | | | | | |
|------------------------------|-------------------------------------|---------|-------------|--------|-----|-------------|
| Stephens-Lewis m.fl., (2019) | Behandlingsprogram för våldsutövare | UK | 9 Artiklar | 1030 | Hög | Meta-analys |
| Travers m.fl., (2021) | Behandlingsprogram för våldsutövare | Danmark | 31 Artiklar | 19 309 | Hög | Meta-analys |
| Waller (2016) | Behandlingsprogram för våldsutövare | USA | 26 Artiklar | 10 809 | Hög | Översikt |
| Wilson m.fl., (2021) | Behandlingsprogram för våldsutövare | USA | 11 Artiklar | 4824 | Hög | Meta-analys |

Tabell 4. Inkluderade översikter i tema Våld i HBTQI relationer, Stalkning och Hedersrelaterat våld och förtryck.

| Våld i HBTQI relationer | | | | | | |
|--|---|-------------|---|------------------------|---------------------------|----------------------|
| <i>Författare, Årtal</i> | <i>Ämne</i> | <i>Land</i> | <i>Antal studier</i> | <i>Antal deltagare</i> | <i>Kvalitetsbedömning</i> | <i>Metod</i> |
| Lorenzetti, m.fl., (2017) | Våld i HBTQI relationer | Kanada | 81 Artiklar 24 Bokkapitel 65 Rapporter 6 Rättsliga dokument 20 Webbsidor 2 Uppsatser 2 Manualer | 5091 | Medel | Systematisk översikt |
| Stalkning | | | | | | |
| Bakers, m.fl., (2020) | Rättsväsendets riskhantering av stalkningsärenden | USA | 22 Artiklar | 7878 | Hög | Systematisk översikt |

Förebyggande av våld i nära relationer – kort svar

Bakgrund

I ett regeringsbeslut har Forte fått uppdraget att kartlägga forskning om mäns våld mot kvinnor, våld i nära relationer och hedersrelaterat våld och förtryck. SBU:s upplysningstjänst gjort en litteratursökning efter systematiska översikter för en del av frågeställningen i uppdraget. Detta levereras i formen av en grovgallrad referenslista.

Fråga

Vilken kunskap finns om förebyggande arbete och riskhantering avseende våld i nära relation, specifikt; mäns våld mot kvinnor, våld i samkönade relationer och kvinnors våld mot män?

Frågeställare: Forte

Avgränsningar

Upplysningstjänsten har gjort sökningar (se avsnittet Litteratursökning) i databaserna Academic Search Premier, CINAHL with Full Text, ERIC, Library, Information Science & Technology Abstracts, Psychology and Behavioral Sciences Collection, APA PsycInfo, SocINDEX, Cochrane, Embase, Medline, och Scopus.

Upplysningstjänsten har tillsammans med frågeställaren formulerat frågan enligt följande PICO¹:

- **Population:** Förövare i nära relationer (mäns våld mot kvinnor, våld i samkönade relationer och kvinnors våld mot män) – *inkluderar även insatser riktade till offer/överlevare i grovgallringen och noterar detta i kommentar till referenserna*
- **Intervention:** Förebyggande insatser, Riskhantering (inklusive screening, riskanalys) – *inkluderar även kartläggning/associationer av riskfaktorer i grovgallringen och noterar detta i kommentar till referenserna*
- **Control:** Annan insats eller ingen insats – *används inte för gallring*
- **Outcome:** Riskförändring, våld – *används inte för gallring*

¹ PICO är en förkortning för patient/population/problem, intervention/index test, comparison/control (jämförelseintervention) och outcome (utfallsmått).

Våld och försummelse riktat mot barn (<15 år), extrema situationer (krig, flykt, naturkatastrofer), interpersonal violence (om inte partnervåld är specificerat) exkluderas. Litteratursökningen har begränsats till systematiska översikter.

Resultat från sökningen

Upplysningstjänstens litteratursökning genererade totalt 2 961 artikelsammanfattningar (abstrakt) efter dubblettkontroll. Två utredare på SBU läste alla artikelsammanfattningar och bedömde att 318 översikter och kunde vara relevanta för frågan. Dessa redovisas i Tabell 1.

Projektgrupp

Detta svar är sammanställt av Idha Kurtsdotter (utredare), Laura Lintamo (utredare), Irene Edebert (produktsamordnare), samt Pernilla Östlund (avdelningschef) vid SBU.

Tabell 1 – resultat av grovgallringen

Tabell 1. Systematiska översikter relevanta efter abstraktgranskning

Förebyggande arbete och riskhantering vid hedersrelaterat våld och förtryck – kort svar

Bakgrund

I ett regeringsbeslut har Forte fått uppdraget att kartlägga forskning om mäns våld mot kvinnor, våld i nära relationer och hedersrelaterat våld och förtryck. SBU:s upplysningstjänst gjort en litteratursökning för den del av frågeställningen som rör hedersrelaterat våld och förtryck. Svaret levereras i formen av en referenslista.

Fråga

Vilken sammanställd forskning och vetenskapliga studier finns om förebyggande insatser och riskhantering vid hedersrelaterat våld och förtryck?

Frågeställare: Forte

Avgränsningar

Upplysningstjänsten har gjort sökningar (se avsnittet Litteratursökning) i databaserna APA PsycInfo, SocINDEX, Academic Search Premier, Cochrane, och Sociological abstracts.

Upplysningstjänsten har tillsammans med frågeställaren formulerat frågan enligt följande PICO¹:

- Population: Förövare av och utsatta för hedersrelaterat våld och förtryck
- Intervention: Förebyggande interventioner och riskhantering – *inkluderar även riskfaktorer och mätinstrument vid gallring*
- Control: Annan insats eller ingen insats – *används inte för urval*
- Outcome: Riskförändring – *används inte för urval*

¹ PICO är en förkortning för patient/population/problem, intervention/index test, comparison/control (jämförelseintervention) och outcome (utfallsmått).

För att vi skulle inkludera en artikel i svaret krävde vi att den var publicerad på engelska eller ett av de skandinaviska språken.

Endast artiklar som genomgått en peer review är inkluderade.

Resultat från sökningen

Upplysningstjänstens litteratursökning genererade totalt 2 955 artikelsammanfattningar (abstrakt) efter dubblettkontroll. I ett första steg läste en utredare alla artikelsammanfattningarna och bedömde att 1 623 artiklar kunde vara relevanta för frågan. I ett andra steg läste två utredare på SBU, oberoende av varandra de 1 623 artikelsammanfattningar och bedömde att 80 artiklar kunde vara relevanta för frågan. Dessa artiklar redovisas i Tabell 1.

Projektgrupp

Detta svar är sammanställt av Laura Lintamo (utredare), Idha Kurtsdotter (utredare), Irene Edebert (produktsamordnare), samt Pernilla Östlund (avdelningschef) vid SBU.

Tabell 1 – resultat av grovgallringen

(Studierna är listade endast en gång, även om de kan tillhöra flera av kategorierna nedan)

Förebyggande arbete och riskhantering vid stalkning – kort svar

Bakgrund

I ett regeringsbeslut har Forte fått uppdraget att kartlägga forskning om mäns våld mot kvinnor, våld i nära relationer och hedersrelaterat våld och förtryck. SBU:s upplysningstjänst gjort en litteratursökning för den del av frågeställningen som rör stalkning. Svaret levereras i formen av en grovgallrad referenslista.

Fråga

Vilken sammanställd forskning och vetenskapliga studier finns om förebyggande insatser och riskhantering vid stalkning?

Frågeställare: Forte

Avgränsningar

Upplysningstjänsten har gjort sökningar (se avsnittet Litteratursökning) i databaserna Academic Search Premier, CINAHL with Full Text, ERIC, Library, Information Science & Technology Abstracts, Psychology and Behavioral Sciences Collection, APA PsycInfo, SocINDEX, Cochrane, Embase, Medline, och Scopus.

Upplysningstjänsten har tillsammans med frågeställaren formulerat frågan enligt följande PICO¹:

- Population: Förövare och utsatta vid stalkning
- Intervention: Förebyggande interventioner och riskhantering – *inkluderar även riskfaktorer och mätinstrument vid gallring*
- Control: Annan insats eller ingen insats – *används inte för gallring*
- Outcome: Riskförändring, återfall – *används inte för gallring*

¹ PICO är en förkortning för patient/population/problem, intervention/index test, comparison/control (jämförelseintervention) och outcome (utfallsmått).

För att vi skulle inkludera en artikel i svaret krävde vi att den var publicerad på engelska eller ett av de skandinaviska språken.

Endast artiklar som genomgått en peer review är inkluderade.

Resultat från sökningen

Upplysningstjänstens litteratursökning genererade totalt 2 854 artikelsammanfattningar (abstrakt) efter dubblettkontroll. I ett första steg läste en utredare alla artikelsammanfattningarna och bedömde att 1 971 artiklar kunde vara relevanta för frågan. I ett andra steg läste två utredare på SBU de 1 971 artikelsammanfattningar och bedömde att 199 artiklar kunde vara relevanta för frågan. Dessa artiklar redovisas i Tabell 1.

Projektgrupp

Detta svar är sammanställt av Idha Kurtsdotter (utredare), Laura Lintamo (utredare), Irene Edebert (produktsamordnare), samt Pernilla Östlund (avdelningschef) vid SBU.
